Experience

John Wiley & Sons / Software Engineer

November 2021 - Present, Remote

My work revolves around our core product, which is a wordpress custom theme that gets used by over 100+ universities worldwide. Main duties include:

- Developing new features
- Fixing bugs
- Extending functionality of already built features
- Developing in HTML, Sass, PHP, JavaScript mostly
- Collaborating with colleagues across different teams
- Follow Agile methodologies
- Building responsive layouts and components from Adobe XD or Photoshop mockups with high attention to detail.
- Writing PHP for use with custom wordpress functionality e.g. Creating custom Gutenberg blocks in conjunction with Advanced Custom Fields
- Cross device and cross browser testing
- Collaborating with multiple other developers on the same project via version control (git/github)

AirTight Design / Front-end Developer

January 2020 - November 2021, Atlanta, GA

Develop new websites based upon mockups. Make changes to existing websites as per client requests. Some duties include:

- Writing semantic, standards-compliant HTML markup
- Writing clean CSS/Sass using layout methods such as flexbox and grid

- Writing functional JavaScript for basic UI interactions
- Writing PHP for use with custom wordpress functionality e.g. Creating custom Gutenberg blocks in conjunction with Advanced Custom Fields
- Building responsive layouts and components from Adobe XD or Photoshop mockups with high attention to detail.
- Creating new WordPress features as per client requests
- Cross device and cross browser testing
- Making sure sites are optimized to have a fast pagespeed score.
- Implementing SEO best practices on sites
- Auditing sites for WCAG Compliance and fix any non WCAG compliant issues.
- Collaborating with multiple other developers on the same project via version control (git)
- Occasional use of Adobe Photoshop, Illustrator and XD

Mainstreethost / Web Developer II

October 2018 - December 2019 Buffalo, NY

Implement the development and design of websites, logos, and other web services based on the needs of clients. Some essential aspects of the job include:

- Translation of Photoshop files into pixel perfect HTML/CSS
- Design and develop websites in WordPress ensuring strong SEO optimization and functionality
- Debug/edit PHP site files as needed
- Create responsive designs by use of media queries/Bootstrap/Flexbox, CSS Grid
- Cross browser/device testing and debugging
- Make changes to the website based on feedback from management and clients
- Create visual concepts that communicate key ideas, product features, and promotions
- Collaborate on client strategy and goal definition for success with multiple departments
- Assist and educate clients on how to use WordPress CMS

Education

SUNY Buffalo State College / B.S. Speech-language Pathology Minor in Spanish

September 2011 - May 2016, Buffalo, NY
